

planet LW

Powered by Bang & Olufsen ICEpower®

The Planet LW will revolutionize your way of listening to music with a wireless connection between the speakers and your iPod/iPhone/iPad or your PC/Apple computer. You'll no longer need an amplifier, a CD player, a DAC or other unsightly black boxes.

In each speaker (100W), active crossover with ICEpower® amplifiers by Bang & Olufsen connected directly to the tweeter and woofer propel the Planet LW speakers toward new heights of audio fidelity. ICEpower® is an independent subsidiary of Bang & Olufsen a/s.

Using the included remote control, you'll control volume, play, pause, and track selection.
